

- DNV 2.7-1
- EN12079
- Cargo securing points inside
- Available fully galvanized
- Flemish splice sling option

Our baskets are designed and built to DNV 2.7-1 / EN12079 standards capable of handling the dynamic loads inflicted on them by lifting operations between moving vessels in the harshest of environments.

These full 8' wide baskets provide full truck transportation width and are capable of being stacked 2 high while still being within legal height. These come with the options of either tie down rings inside or ratchet winches for webbing straps .

Structurally robust to endure the rigors of long term offshore use. Includes tag line D-rings on all four sides for easy orientation. Empty lift pockets allow for loading and side shift on smaller forklifts.

Weights and dimensions in both metric and standard are displayed on the outside of the basket.
